

Bridging Research Program between Germany and Spain

PhD Candidate Position Available

on

Synthesis of Organic/Inorganic Complex Materials under the Confinement of Colloidal Systems

The Max Planck Institute for Polymer Research (Mainz, Germany), in collaboration with the Institute of Materials Science at the University of Valencia (Spain), is looking for a highly motivated and creative PhD student to work in a collaborative project on the synthesis of organic/inorganic complex materials under the confinement of colloidal systems.

The work will be supervised by Dr. Rafael Muñoz-Espí at the University of Valencia, Spain, and co-supervised by Prof. Katharina Landfester at the Max Planck Institute for Polymer Research in Mainz, Germany.

The main working place will be the University of Valencia and the degree should be in principle granted by this institution, but research stays at the Max Planck Institute for Polymer Research in Mainz are part of the program.

Requirements:

- Master's degree (or equivalent) in Chemistry with very good grades
- Previous experience in research and good skills in preparative chemistry
- Fluent spoken and written English
- Basic knowledge of Spanish and Catalan is an advantage, but not compulsory

The starting date will be in summer/fall 2015, upon agreement with the selected candidate.

Contact:

Submit your complete electronic application in English (cover letter, CV, copy of academic records, and references if available) to:

Dr. Rafael Muñoz-Espí: munoz@mpip-mainz.mpg.de

Applications will be accepted until the position is filled.

June 2015
